

EE432

Cable sensors for passive temperature measurement are used in heating, ventilation, air conditioning systems as well as for process control.

Several types of sensing elements are available, such as Pt100 and Pt1000.

The IP67/NEMA 4X protection rating is made possible by the innovative star pressing of the sensor sleeve.

The mounting flange included in the scope of supply facilitates the installation of the EE432.

Product specific information printed all along the cable allows for easy identification of the sensing element type.
